

HEAT REFLECTOR PROGRAMS FOR SCHOOLS

REDUCE HEATING COSTS AND IMPROVE STUDENTS COMFORT

School buildings or post secondary facilities with *HOT WATER HEATING SYSTEMS* using convectors or radiators will benefit by installing Novitherm™ Heat Reflectors which will reduce heating costs and improve student and staff comfort.

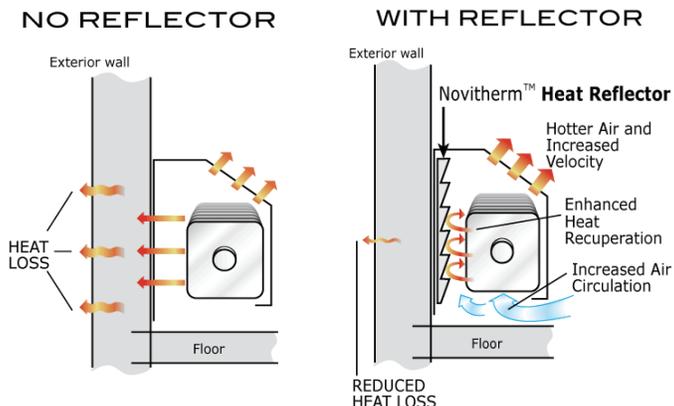

Novitherm™ Heat Reflector features:

- Reduction of greenhouse gas emissions
- A minimum life expectancy of 25 years
- A typical pay back of just 3-5 years from Energy Savings
- Proven technology with consistent measured savings above 10%

Gas Utility Programs offer incentives based on a reduction of 10% of your space heating load since 2000. Enbridge Gas offers an incentive of 10¢ per cubic meter reduction of heating load.

Thousands of homes, apartment buildings, schools, churches, hospitals and military buildings have installed *Novitherm™ Heat Reflectors* in North America.

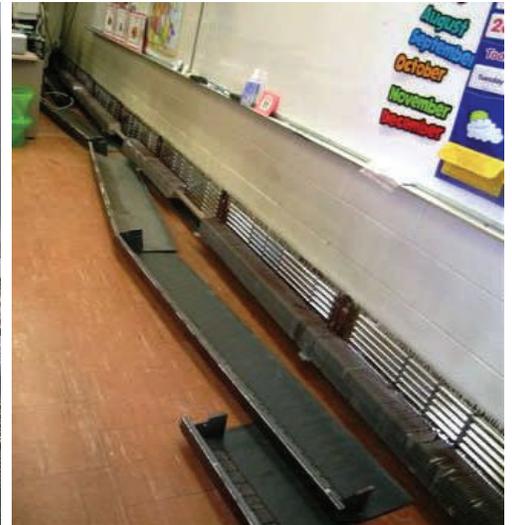

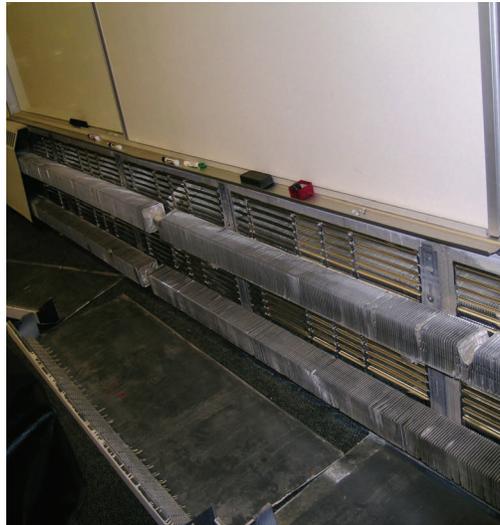

**Student Comfort + Energy Savings + Greenhouse Gas Reduction
= Novitherm™ Heat Reflectors**
